

The ACE-4X expansion card is designed to add an additional 32 digital inputs.

Hardware switches, rotary encoders or digital circuitry can be connected and used in conjunction with Plasma™ modules.

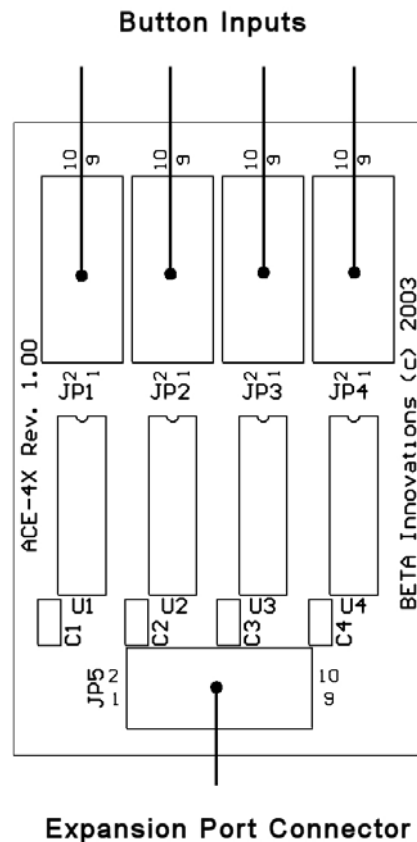

Features:

- Compatible with Plasma™ V2 & Plasma-Lite™ V2 USB adapters.
- 4 digital ports, 8 bits each.
- 32 digital inputs

Application:

The ACE-4X expansion card is compatible with all Plasma ACE expansion ports. This card adds an additional 32 digital inputs and requires no configuration. These additional button inputs will appear following Plasma™ standard compliment of button inputs.

Visit www.betainnovations.com for the availability of expansion modules and accessories.
